#### Overview of the first three quarters ended June 30, 2015 (From October 1, 2014 to June 30, 2015)

During the first three quarters under review, smartphone unit sales slowed because the smartphone penetration rate has already exceeded 50%. However, the penetration and expansion of smartphones continued, backed by the strong demand to replace conventional cellphones with smartphones.

In this environment, the Company aggressively conducted promotions during the busiest shopping season (March), and as a result the number of paying subscribers on smartphones increased until the second quarter. In the third quarter, however, the number of paying subscribers declined from that at the end of March 2015 because the said quarter is a low season for smartphone sales and the effect of releasing new smartphone models is limited. As a result, the number of paying subscribers stood at 5.69 million at the end of June 2015 (up 0.29 million from the end of September 2014).

As the shift to smartphones progressed, the number of paying subscribers on feature phones has been declining, albeit at a slower pace, with the number falling to 2.04 million at the end of June 2015 (down 0.42 million).

As a result, the total number of paying subscribers decreased to 7.73 million at the end of June 2015 (down 0.13 million).

Net sales increased to \$24,881 million (up 8.1% year on year), despite the largely unchanged number of paying subscribers, chiefly due to a rise in the average revenue per user (ARPU) of major services and an increase in sales of the unmetered plan with flat-rate monthly charges for cellphone carriers. Gross profit also rose to \$20,933 million (rising 8.5% year on year).

Operating income, ordinary income, and net income came to ¥3,528 million (up 82.7%), ¥3,439 million (up 78.7%), and ¥1,944 million (up 92.6%) respectively, reflecting an increase in gross profit and the appropriate control of selling, general, and administrative expenses (SG&A) through meaningful use.

#### (2) Explanation on financial position

#### Assets, Liabilities and Net assets

At the end of the first three quarters under review, total assets rose ¥6,063 million from the end of September 2014 to ¥22.831 million.

Current assets increased ¥5,874 million mainly due to increases in cash and deposits and notes and accounts receivable-trade. Non-current assets increased ¥188 million as a result of growth in goodwill, offsetting a decrease in deferred tax assets.

Current liabilities rose ¥245 million, primarily reflecting increases in the current portion of long-term loans payable. Non-current liabilities fell ¥391 million, chiefly due to a decrease in long-term loans payable.

Net assets increased ¥6,209 million, largely as a result of an increase in capital through a public offering and the posting of ¥1,944 million in net income, even though cash dividends were paid.

#### (3) Explanation of future forecast information including consolidated forecast

In the fourth quarter, the Company will continue to focus on boosting the number of paying subscribers on smartphones and work to increase the average revenue per user (ARPU).

Taking advantage of the strength the Company has developed, which is having the largest sales channel by far for promoting sales of its own content and that of other companies to customers at cellphone shops across Japan, the Company will strive to expand the number of paying subscribers on smartphones of its own content, and bolster sales commissions for the content of other companies.

The number of paying subscribers for the general store "music.jp" (400 yen/month excl. tax) that distributes music, books, and videos has been steadily growing, and the Company will continue to promote its growth to increase the ARPU. In July, the Company launched a service integrating weather information and map navigation.

In healthcare-related information services, the Company will expand the number of paying subscribers on a Q&A website on health where healthcare-related professionals respond to questions 24 hours a day. This site was provided at a fixed rate of \(\frac{\pma}{3}00\) per month (excl. tax), but a new service was also added in June at a rate of \(\frac{\pma}{4}400\) per month (excl. tax).

As sales of the unmetered plan with flat-rate monthly charges for cellphone carries continue to increase, the

Company will aggressively take measures that will contribute to the sustainable expansion of sales.

Our forecast for consolidated business results for the fiscal year ending September 30, 2015 is as described in the notice of revisions to forecasts for consolidated business results and dividends that was announced on February 4, 2015.

#### 2 Matters relating to summary information (Notes)

#### (1) Changes in important subsidiaries during the period

Not applicable.

## (2) Adoption of specific accounting methods for producing quarterly consolidated financial statement

Not applicable.

#### (3) Changes in accounting policies, changes in accounting estimates, restatements

Not applicable.

(Adoption for accounting policies concerning provision for retirement benefits)

Effective from the first quarter of the current fiscal year under review, the Company adopted the provisions set forth in the main clauses of paragraph 35 of the "Accounting Standard for Retirement Benefits" (ASBJ Statement No. 26, May 17, 2012; "the Accounting Standard for Retirement Benefits") and paragraph 67 of the "Guidance on Accounting Standard for Retirement Benefits" (ASBJ Guidance No. 25, May 17, 2012; "the Guidance on Accounting Standard for Retirement Benefits"). Consequently, the Company has reviewed the method of calculating retirement benefit obligations and service costs and changed the method of determining the discount rate from the method of using a discount rate based on the number of years that approximates the average remaining service lives of employees to the method of using a single weighted average discount rate that reflects the expected payment period of retirement benefits and the amount for each expected payment period.

With respect to the application of the Accounting Standard for Retirement Benefits, etc., the amount of impact associated with the change of the calculation method of retirement benefit obligations and service costs is added to or subtracted from retained earnings at the beginning of the first three quarters under review in accordance with the transitional treatment as stipulated in paragraph 37 of the Accounting Standard for Retirement Benefits.

As a result, at the end of the first three quarters under review, the defined benefit liability declined \(\frac{\pmathbf{4}}{61,720}\) thousand while retained earnings increased \(\frac{\pmathbf{3}}{39,723}\) thousand. The impact on operating income, ordinary income and income before income taxes in the first three quarters under review is minor.
